Goods (Official requirements)

The better you are acquainted with Segway, the easier it is to manage it, so we ask that you:

- 1) Carefully read the instructions «Ninebot Mini», and go through a special training according to the instructions of the user application App;
- 2) Do not allow use Mini to people who have not read the instruction «Ninebot Mini» and have not been training User Application App;
- 3) Based on the properties of the quality Mini, after the purchase buy insurance to minimize risks;
- 4) Every Segway Mini has a limit, and is designed for use by one person only, and not a few at a time;
- 5) All accessories Mini should be installed only in accordance with the instructions in the manual «NinebotMini». Incorrect installation can cause falls, loss of management control or a collision. Before installation or maintenance, disconnect the power supply from the vehicle, and during the installation of accessories, to exert appropriate efforts, is too strong or weak screwing parts may cause any failure or injury;
- 6) Do not recharge the device in rooms with high humidity. During charging, plug the power cord into an appropriate outlet (100V-240V / 50Hz-60Hz). Limit your children and pets from any contact with the rechargeable device, and install it away from flammable substances;
- 7) Do not leave the battery in areas with temperatures below -20°C or greater than 50°C;
- 8) If the battery has some damage, makes a strange smell smoke coming from it or it is overheating, please do not continue to use a battery, and if you notice that the battery is leaked, do not let any contacts with other subjects;
- 9) The battery contains harmful substances, so do not disassemble and

dismantle it;

- 10) Fully charged Mini last about 120-180 days in standby mode. Mini that is not fully charged last for about 30-60 days in standby mode. Pay special attention to charge level of the device as untimely charging devices may cause serious damage, which can not be repaired;
- 11) We have created a lot of different warnings about the danger for the Mini in different environments and driving conditions, as a warning to speed limit, warning of shaking, a reversing device and many other warnings. At the time of occurrence of a specific warning, stop, try to eliminate any risks, and then go on your way;
- 12) You need to become familiar with and understand the technology riding Mini, to travel in public areas. The more you train, the more practicing in different environments, the better and safer will be your riding of Segway. Remember the basics of practice riding on this vehicle: first go through an initial level of control, select the room (> 4m * 4m) without any hindrance and practice go ahead, work out with turns, stops, and also learn how to control your body and still maintain a relaxed state. For the most productive training of segway riding would be appropriate assistance of an experienced person riding a Segway, or a coach. After achieving some success in the riding of the vehicle in a room with limited space, you can start to train to ride on the street. As a result of constant updates of Mini, which may be accompanied by some new features riding test at the first update should be chosen sufficiently familiar and safe areas;
- 13) Before every ride on Mini, you must thoroughly test and inspect a vehicle, make sure that there are no loose parts or screws;
- 14) Before riding, while riding or when braking, watch out for traffic at intersections to avoid injury to yourself and others;
- 15) Maintain a certain level of tire pressure (indicated in the table of parameters). Exceeding the normal range may result in loss of control,

vehicle control, fall or collision. However, the level of too low tire pressure can also cause some damage to the device;

16) Inspect wheels and check tire pressure levels at least 2 times a month and before every long trip. Otherwise, poor tire pressure can cause disruptions in the normal ride of the device or damage to the wheels and tires, until the occurrence of an accident or incident;

17) If, during the control of segway, you have any doubts about the reliability and proper operation of the wheels, stop and check them to avoid an accident or incident;

18) It is necessary to stand on Segway with his back side and be sure to wear protective gear;

19) To ride Segway in any case do not wear high-heeled shoes;

20) Do not immerse the battery and the vehicle itself in the water, ride a Segway in the pouring rain, or a long time to ride in the rain. Do not wash the unit under the strong pressure of water, avoid getting water in the connector for charging the device. If your Segway still wet under the heavy rain, immediately using dry towels and rags, wipe it dry, stop using it and promptly contact the consultants device support;

21) On rainy days, the effectiveness of the brakes of Segway Mini greatly reduced (as well as in other vehicles), besides the resistance force is also strongly reduced. You can also note the complications in Segway control, and therefore have a greater risk of loss of control of riding. To ensure the safe riding of vehicle in the rain, you should choose a slower speed mode, as opposed to riding the vehicle under normal weather conditions before starting your braking distance;

22) Riding Segway at night is more dangerous than during the day, because it will be much harder to keep track of traffic and pedestrians. That's why we do not recommend you to ride a Segway at dawn, at dusk or at night. A man who still makes the decision to ride the Segway at dawn, at dusk or at night, should be aware of all the risks, be extremely careful, this will help reduce risks. If you are interested in the equipment for safe driving, contact and consult with the dealer;

23) When the battery level is low or not at all, Segway power will not be enough to maintain a balance, so recharge the batteries in a timely manner;

24) Various safety monitoring system can produce a safe shutdown in case of violation of a safe distance control to 1.5m .;

25) A unique balance and ease of use Mini will make you more confident. If you overdo it with driving on roads with obstacles on uneven, slippery surfaces or sharp slopes, it can lead to loss of control, fall or collision. Mini can only maintain its balance, so you must learn to balance the body when turning;

26) While driving, be alert and focused when the road surface changes, such as regular road and lawn.

27) While turning, be careful and cautious! Maneuvering and turns at high speeds can cause loss of control of device!

28) Do not take chances! If on your way there was a sharp slope, not even part of the road or other obstacles, think about your safety, do not expose themselves to danger;

29) If you went to the Segway on the road, it is prohibited to leave the lane for motorized vehicles, obey traffic laws, yield to pedestrians, as well as prohibited to start the movement at a red light;

30) Respect the rights of all road users - motorcyclists, cyclists, pedestrians and other road users, both on the road and in the small streets;

31) You have to be conscious, while riding a Segway. Carefully observe the direction opposite to the movement of pedestrians;

32) During the ride to the Mini, you should know how to behave in the following circumstances: A vehicle leaves the intersection in front of you or ahead of you from behind, and then diminishes or the speed begins to turn. Opens the car door. A man came out of the pavement. Next to the road children play or walk their pets. Potholes, sewer walls, railroad tracks, expansion joints, road or sidewalk construction, debris and other obstacles

that may arise in your way and create a dangerous situation. All this may lead to your disorientation, loss of control, hit the wheel on an obstacle, with the result that it may be a road accident.

33) Try to go on the bike path or close to the edge of the carriageway of the road, in the direction of transport or under the rules of the local road traffic authorities;

34) During a stop in front of a particular sign or traffic light, watch for the direction of transport at intersections. Keep in mind that when you ride a Mini, even if you ride at your side, you have to give way to the car to avoid a collision of vehicles;

35) While stopped, or turn on the Segway, use hand signals to indicate to other vehicles and pedestrians your direction of travel;

36) It is forbidden to ride a Segway, with one hand on the adjacent vehicle;

37) During ride the Segway do not make any tricks;

38) Do not ride a Segway, under the following conditions: terrible weather conditions, poor visibility, at dusk, at dawn or in the dark, or if you feel unwell. All these conditions increase the risk of a road incident or accident;

39) No need to drive yourself over long distances. Bring your friends for company. You must also tell your family where you are going and your expected time of return;

40) During the ride Segway, you get a bit higher than usual. So be careful not to injure the head during entry into the elevator, or doorway;

41) Do not wear loose clothing to avoid contact with clothes in the wheel;

42) To ride Segway, we recommend you wear safety glasses: they will protect your eyes from various specks, dust and insects. During a bright and sunny weather, use dark glasses, and during cloudy - glasses wear clear glass;

43) Do not carry or take passengers. Mini is only for one person, two people simultaneously riding on a Segway is forbidden. It is also forbidden to ride a

Segway, holding a baby in arms;

44) Mini is not a medical device, it can not be used as a therapeutic tool. If you are not getting help from someone, you should be able to raise Mini on your own, only in this case, you can use it;

45) Do not ride your Segway on stairs, escalator and pass through revolving door;

46) It is forbidden to ride a Segway, in the case of poor visibility;

47) Do not ride your Segway on a highway, except if it allowed by road transport control;

48) Do not use Mini as a goods transport vehicle;

49) When approaching or crossing intersections, traffic lane for motorized vehicles to turn, you should turn down the speed and give way to pedestrians, cyclists and vehicles;

50) Mini is a kind of vehicle, so when using it, you must be vigilant. If you are sick or do not possess all the skills and knowledge of riding Segway specified in the instruction «Ninebot Mini», do not try to use the device. Also, do not use Segway if you are taking medication, after which it is not desirable to drive vehicles;

51) That you are not distracted while riding a Segway, do not answer the phone and do not make any sudden movements, which scatter your attention;

52) Age limit: any persons allowed to use from 16 to 50 years. Advice to parents: Parents and guardians are responsible for the actions of minor children, so we recommend that you do not allow children to ride on the Mini;

53) Avoid sudden braking, especially on slippery surfaces, because under these conditions, you put yourself at risk;

54) If you turn off the device after parked it, the device can move or even fall, so you first need to turn off the device, and then leave it parked on the Segway;

55) If you use a Segway in the summer time, you must remember that you must leave the Mini in a safe place or premises where the temperature does not exceed 450, and do not leave it for long periods of time outside in the hot sun;

56) If you use a Segway in the winter, remember: you must leave the Mini in a safe place or premises where the temperature is below -200, if the room temperature is below 00, it must be placed in a warm room (where the temperature is higher than 100) then you can charge it;

57) Upgrade of your Segway may also have certain risks for your safety, it is

forbidden to repair the device;

58) You should be aware of the rules and norms of law and respect them;

59) We can not assess each of each Mini during use. If you have any questions or problems arised during use of Segway to obtain certain guarantees reliability of the device, please contact technical support of our company;

60) Characteristics and data between the Mini and other models may be different. These data are subject to change without notice.

These formal requirements Ninebot comply with the legislation of the PRC. In the case of the above stated situations that lead to compensation and the possible liability of certain damages, the company is not responsible. In the event of unforeseen circumstances or imminent danger and risk, the buyer bears the responsibility.

You can take control conditions in the product; but you also can not accept

the terms of controlling this product and return it. This return is possible, if the product and its packaging are in proper form and are comply for secondary sale.

If you decide to resell the Mini, do not forget about the «official Ninebot», as it is an integral and fundamental part of this product.

Once again thank you for your choice and the trust to company Ninebot!
