

Brief description

2

Preparation to work

Usage

Correct placement of the Air Purifier

For good purification of air, when using the device it is necessary to establish it at a certain distance from walls to prevent preventing of an input of air in the air cleaner

Recommended distance to walls:

20sm and more
10sm and more
20sm and more

Switch /operating mode selection

Press the button for inclusion, fast change of the mode. When pressing and keeping the button during 2 seconds, the device is switched off

Mode indicator

It is used green and orange colors for the notice of quality of air in the room

Usage

Switching of the indicator

Press the button on the air cleaner back, for shutdown indicators. Press any button for turning on indicators.

Installation of a mobile application

In Mi store find application «Mi smart house» or scan the QR-code

Attention: if phone isn't connected to the air cleaner

Please follow the operation "Maintenance" - "Reset WiFi"

Maintenance

Replacement of the filter

It is necessary to change the filter time in 3-6 months. The filter should be changed when every time at turning on of the air cleaner, lights up the red indicator and shines within 30 seconds

buy a filter at
www.xiaomi-mi.com

setup a filter

To watch additional information in the section "Installation", step 2

After replacement and the filter and its inclusion, press the button from the back of the air cleaner and hold it within 6 seconds. When some beeps sound, it will specify that replacement of the filter is successfully complete. And the air cleaner starts new counting of term of use of the new air cleaner over again.

Attention:

- For adsorption of the polluted air in the filter there is a charcoal which can promote emergence of sourish smack, but this normal phenomenon.
- When the air cleaner absorbs the polluted air, emergence of a specific smell is possible, you can place the filter with charcoal in well aired lit place for a certain time, and this smell has to disappear.

Usage and maintenance

Cleaning of the sensor of dust

If the indicator specifies that there was an error of quality of air, open the back panel of the sensor and vacuum it. Perhaps he was filled with dust.

Before will execute the above actions, be convinced that you switched off the device and disconnected it from power.

Cleaning the impeller

Turn counterclockwise the top lattice of impeller and turn off it. Turn off a lid to get the lower impeller and to clear it.

Note: Rotate the impeller clockwise in order to tighten it

Before will execute the above actions, be convinced that you switched off the device and disconnected it from power.

Cleaning of box for the filter

For good purification of air and its ventilation, it is possible to vacuum air vents and all walls from dust, or, using a soft rag, slightly to wipe them.

Before will execute the above actions, be convinced that you switched off the device and disconnected it from power.

Reset Wi Fi settings

After connection of phone to the air cleaner, press the buttons "operating mode choice" and the "switching of the indicator" button and hold them within 5 seconds. After you hear beeps, it will mean that dumping of the WIFI settings is successfully complete.
