# oclean

Quick user guide

- Briefly press the power button to start the teeth cleaning mode,
- When using the brush, to switch the intensity of the cleaning press and hold the button for 2 seconds or longer;
- Lights of indicators 1-4 shows different intensity of cleaning, the more indicators light up, the higher the intensity of cleaning;
- By default, the standard cleaning mode is used, if you need more cleaning modes, as well as for checking tooth decay reports, download the Oclean mobile app, connect to the brush with Bluetooth, and make individual settings and switching modes.
