

## 01 Installation

Installing the adapter and the bulb.  
Insert the adapter into the suited slot of Mi router.

\* Mi router also supports other official devices.

## 02

Bulb installation  
Screw the bulb, turn on the power switch

## 03 APP Control

Download and install Mi APP, in the list of smart devices you will find an installed bulb.  
If after installing the bulb it does not appear on the list of mobile application, try to restore to factory settings

\* Make sure that your phone is connected to WIFI and to Mi router.

### Restore bulb to factory setting

Keep your bulb on for at least 30s, then turn it off, now you can do the restore operation as following steps:

- 1) Turn bulb on, when it's up and shows maximum white light, turn off immediately (less than 5 seconds);
- 2) Repeat above step for 3 times;
- 3) Then turn on the bulb again, you could see bulb shows red/green/blue/white, it means the operation is successful.

### Caution

- \*Please confirm the power voltage before installation, incompatible voltage may cause safety issue;
- \* Do NOT teardown product;
- \* Because of the heat given by LEDs, please install the bulb in free air, make sure there is no enclosure to trap heat.

## List of components
