**Installation**
Insert the adapter into the suited slot of the router.

02 **Bulb installation**
Screw the bulb, turn on the power switch.

03 **APP Control**
Download and install Mi APP; in the list of smart devices you will find an installed bulb. If a bulb does not appear in the list of mobile application, try to restore to factory settings.

* Make sure that your phone is connected to WiFi and to the router.

**Restore bulb to factory setting**
Keep your bulb on for at least 30s, then turn it off, now you can do the restore operation as following steps:
1. Turn bulb on when it's up and show maximum white light, turn off immediately (less than 5 seconds).
2. Repeat above step for 3 times.
3. Then turn on the bulb again; you could see bulb shows red/green/blue/white, it means the operation is successful.

**Caution**
* Please confirm the power voltage before installation; incompatible voltage may cause safety issue.
* Do NOT tear down products.
* Because of the heat given by LEDs, please install the bulb in free air, make sure there is no enclosure to trap heat.
